THE PSYCHOLOGY MAJOR
AT
CENTRAL CONNECTICUT STATE UNIVERSITY

General Education, BA & Minor Requirements

--- IMPORTANT FOR STUDENTS ---

- You need to follow the curriculum that was in effect during the year that you officially became a Psychology Major. For many, this would be the year that you matriculated at CCSU. However, if you declared your Psychology Major after you matriculated you need to follow the curriculum in place at the time of your declaration.

- This version of The Psychology Major presents the program of study for all psychology majors entering CCSU in Spring 2007 and thereafter.

- Students who become a Psychology major at CCSU prior to that should see the appropriate appendix for a description of the major and general education requirements in place at that time.

If you declared your major:
- Between Fall 2003 and Fall 2006 see Appendix A
- Between Fall 2001 and Spring 2003 see Appendix B
- Between Fall 1998 and Spring 2001, see Appendix C
- Between Fall 1993 and Spring 1998, see Appendix D
- Between Fall 1989 and Fall 1993, see Appendix E
- Between Fall 1989, see Appendix F

1. INTRODUCTION

Psychology is one of the most popular majors at Central Connecticut State University (CCSU). A background in psychology prepares students for a wide variety of careers. This booklet gives you basic information about the requirements for students who major in psychology at Central Connecticut State University. This includes information regarding General Education requirements, the specific courses required for the major in psychology, an explanation of minors, as well as some guidance in terms of planning a career in psychology. This booklet is not designed to substitute for regular meetings with your advisor, a faculty member in the Psychology Department. You should meet with your advisor each semester to receive your alternate PIN number needed for registration and continue to plan your courses and career goals. Also, visit our website regularly…

860-832-3100  Psychology Department Office
860-832-3123  Fax
www.psychology.ccsu.edu
**How do I become a Psychology major?**

The first step in becoming a psychology major is to declare your major at the Registrar's Office, 115 Davidson (Administration) Hall. They will give you a form to bring to the Psychology Department. Bring this form to the Psychology Department Secretary (Room # 211, Marcus White Hall) who will assign you a faculty advisor. It is a good idea to make an appointment to see your advisor as soon as you're assigned one. Your faculty advisor will be a key person in helping you develop your academic program at Central Connecticut as well as assisting you in planning your future career. **EARLY consultation with your advisor will result in effective academic planning.**

**What programs does CCSU offer in Psychology?**

The Psychology Department, as part of the School of Arts and Sciences, offers the Bachelor of Arts (B.A.) and Masters of Arts (M.A) degree in Psychology. **Neither a B.A. nor an M.A. degree in Psychology will certify you to teach at the elementary or secondary level in Connecticut.**

For information regarding Teaching Certification, please contact the Dean’s Office at the School of Education (248 Barnard Hall, 832-2100).

**2. GENERAL EDUCATION FOR PSYCHOLOGY MAJORS**

**What is General Education?**

The goal of a liberal arts education is to broaden your horizons. We want you to learn skills that will help you in your future career endeavors, but we also want you to expand your appreciation of the world around you and prepare you to be an effective citizen. To this end, the General Education (GE) program at CCSU helps students gain a breadth of knowledge in the liberal arts and sciences. Students entering as of Fall 1998 will take courses in 4 Study Areas and 4 Skill Areas (see below). Only courses that indicate that they have been approved will fulfill each requirement. (eg., in your registration booklet the course description will include SA1, meaning Study Area I). A list of courses that fulfill these requirements is found in the college catalogue and on the University website. In addition, students must satisfy the International Requirement, and those entering with less than 15 hours of transfer credit must take a First Year Experience (FYE) course. Each of these program areas is explained below.

</tbody>
</table>

**STUDY AREAS**

**Study Area I — Arts and Humanities** — 9 credit hours. At least 3 credit hours required in literature, and no more than 6 credit hours from any one discipline.  
_Courses that focus on creative expression and interpretations of human experience, or the appreciation and development of thought and ideas._ [In this Study Area, students will typically be exposed to courses in literature, philosophy, and fine arts (music, theatre, and art).]
Study Area II — Social Sciences — 9 credit hours. At least 3 credit hours required in history, and no more than 6 credit hours from any one discipline. Courses that deal with formal social structures (such as governments, interest groups, territorial entities, economic firms) in their historical and contemporary contexts. [In this Study Area, students will typically be exposed to courses in economics, geography, history, and political science.]

Study Area III — Behavioral Sciences — 6 credit hours. Courses that focus on the interaction(s) between and among individuals and/or groups and social/cultural institutions. [In this Study Area, students will typically be exposed to courses in anthropology, psychology, and sociology.]

Study Area IV — Natural Sciences — 6-7 credit hours. A laboratory experience is required. Courses that focus on the scientific analysis of the natural world. [In this Study Area, students will typically be exposed to courses in biology, chemistry, earth science and physics.]

SKILL AREAS

Skill Area I — Communications Skills — 6 credit hours
ENGLISH 110 required. Students who have not completed ENG 110 prior to earning 61 credit hours are required to take ENG 202 instead.

Skill Area II — Mathematics Requirement — 6 credit hours.
Mathematics course appropriate to the student’s major interests plus either one additional mathematics or computer science course. Normally, STAT 215 will count as 3 credits toward Skill Area II.

Skill Area III — Foreign Language Proficiency Requirement — 0-6 credit hours.
Proficiency in a foreign language must be demonstrated before graduation. This requirement may be met by any of the following:

1) 3 sequential years of one foreign language at the high-school level.

2) Elementary proficiency as demonstrated by successfully completing a second-semester-level CCSU foreign-language course (112 or 114). Students with no previous background in a language must take the first and second semesters (111 and 112, or 120); students who place out of 111 due to previous background in the language may satisfy the requirement by taking 112 or 114 only.

3) Successful completion of a foreign-language course at a level higher than the second-semester level.

4) Passing a standardized examination that demonstrates knowledge of a foreign language equivalent to completion of a second-semester course or higher.

5) Demonstration of native proficiency in a language other than English (requires evaluation of skill level by an appropriate faculty member and/or official documentation, and approval by the Chair of the Department of Modern Languages).

Skill Area IV — University Requirement — 2 or 3 credit hours.
Courses designed to foster personal well-being and the development of academic skills essential for the successful pursuit of a university education. PE 144 (Fitness/Wellness Ventures) will be required of all students who enter with fewer than 15 credit hours. Those entering with 15 credit hours or more may complete this requirement with a Skill Area IV course or by taking 2-3 additional credit hours in the Skill Areas described above (I, II or III). Remedial courses, Math 101 and elementary language courses (111
or 112) will not fulfill the Skill Area IV requirement.

**Graduation Requirements**

**International Requirement:** Each student must complete 6 credit hours designated as “International” (I). Such courses shall be defined as ones: 1) dealing with a country or region other than the United States; 2) involving the comparative study of two or more countries or regions, one of which may be the United States; 3) that focus upon global themes; or 4) any foreign language course at the 112 level or higher. **Please note:** meeting the Foreign Language Proficiency Requirement (Skill Area III above) by taking 2 semesters of a language, for example, Spanish 111 and Spanish 112, only provides 3 credit hours towards meeting the International Requirement.

**First Year Experience:** Required for all students with fewer than 15 credit hours and to be taken in the student’s first semester. This requirement may be completed by an FYE section of ENG 110 or an FYE introductory course to a discipline in the Study Areas section of the general education program.

---

**Note:**

**Double-Counting Restriction**

Of the courses taken in the major and minor/concentration, a total of two courses may be counted to fulfill the Study Areas portion of the general education program. Please note, this does not mean that a 3 credit course counts for 6 credits.

If your minor is in a skill area, 2 more courses may count toward both your minor requirements and General Education.

**Degree Evaluation**

Students can access an unofficial degree evaluation on-line through Central Pipeline by clicking on “Degree Evaluation”. This will help you to determine what courses you still need to take, but does not replace the need to see your advisor every semester.
Specific Notes for Psychology Majors Concerning Some Study and Skill Areas.

Study Area III — Behavioral Sciences — 6 credit hours.

Since two courses in a student's major or minor may be applied to fulfill general education requirements, psychology majors will meet the Study Area III requirement by taking the psychology courses needed to complete their major. The specific Psychology courses that fulfill the Study Area III requirement are: PSY 112, PSY 125, PSY 200, PSY 236, Psy 241, and PSY 281. Psy 112 and Psy 236 are required for all Psychology majors.

Study Area IV — Natural Sciences — 6-7 credit hours. A laboratory experience is required.

For Study Area IV, at least one of the courses taken must include a laboratory. Read the course descriptions in the Undergraduate Catalog to be sure a lab course is selected. While some courses include the lab in a 4-credit course, some courses have an optional related laboratory course of one credit.

The Psychology Department recommends BIO 111 & BIO 112 as part of your Natural Sciences requirement.

Skill Area II — Mathematics Requirement — 6 credit hours.

STAT 215 - Statistics for Behavioral Sciences, is required as one of the courses for Skill Area II because it is a prerequisite for PSY 221 - Research Methods in Psychology I. You must earn a grade of C or higher in STAT 215 in order to meet the requirements for the Psychology Major. You must earn a grade of C or higher in STAT 215 in order to meet the requirements for the Psychology Major. You are required to take the Math Placement Exam before you register for your first mathematics course. If you score well on this test, you will be permitted to register for STAT 215. If you do not show sufficient proficiency, you may be required to take MATH 099 (remedial mathematics) and/or MATH 101 as a prerequisite to STAT 215. Taking either or both of these courses (Math 099, Math 101) will not serve towards meeting this Skill Area requirement. [Students who have taken MATH/STAT 104 or the equivalent in the past should not take STAT 215 but will need to complete a course substitution form]. Students will not receive credit for both Math/STAT 104 and STAT 215. Although your grade in Math 099 is factored into your GPA, you will not receive any course credits for this course.

The Psychology Department recommends STAT 216 or CS 110 or CS 113 as the other Skill Area II selection.

NOTE: Students who score 550 or higher on the Math SAT are exempt from Math 101 and qualify to enroll directly in STAT 215.

Skill Area III — Foreign Language Proficiency Requirement — 0-6 credit hours.

Proficiency in a foreign language, besides enriching your life, will greatly increase your marketability in the Human Services Field.

The Psychology Department recommends Spanish to meet your language proficiency requirement.
International Requirement. Students are required to take 6 credits designated as international in content. To find these courses look for the letter "I" in the Undergraduate Catalog course descriptions and the listings of general education (GE) courses.

| Psychology majors will need to meet this requirement through some courses in General Education, your minor, or your additional electives. In addition Cross-Cultural Psychology (Psy 350) can count as 3 credits of international coursework. |

First Year Experience. The Psychology Department offers several FYE sections of PSY 112 and PSY 236 each year. If you are taking psychology courses in your first semester at CCSU, please try to enroll in one of these sections.

A Special Word for Re-entry Students Concerning General Education

Students who re-enter CCSU after a period of withdrawal are generally expected to complete the program requirements, which were in effect when they first entered Central, but may opt for the most recent curriculum and program requirements. You should consult with your advisor or the Department Chair if you have questions.

In many cases, this means that the General Education requirements, as well as the major and minor/concentration requirements, may be different from the current requirements. The Office of the Registrar normally will provide a student with an evaluation of his or her program, which indicates what General Education requirements, must be completed. Consult your academic advisor. For a brief description of the General Education requirements in previous years:

- If you started between Fall 2003 – Fall 2006, see Appendix A
- If you started between Fall 2001 and Spring 2003, see Appendix B
- If you started between Fall 1998 and Spring 2001, see Appendix C
- If you started between Fall 1993 and Spring 1998, see Appendix D
- If you started between Fall 1989 and Fall 1993, see Appendix E
- If you started before Fall 1989, see Appendix F
3. THE MAJOR IN PSYCHOLOGY

The psychology major provides an overview of the field of psychology, its methods of study, and the various sub-fields within psychology. Students decide to major in psychology for many reasons. For some, psychology provides a vehicle for personal development and an avenue for pursuing a liberal arts education. Others study psychology in order to build an understanding of people, which can be used in later careers in business or other professions. Some psychology majors seek future careers in psychology itself or in psychology-related positions, while others take the psychology major as a preparation for graduate school. Whatever a student's reasons for choosing the psychology major, study of psychology will broaden his/her knowledge and will provide empirical basis for understanding people and behavior.

All psychology majors must take at least 14 courses in Psychology as follows:

- Seven required courses
- Four core area courses
- Three elective courses
- Total number of credit hours required in Psychology will depend on your matriculation year.*
- All psychology majors must take the Psychology Assessment Test in their senior year.

Required Courses: The following seven (7) courses are required for all psychology majors:

PSY 112 - General Psychology I [Grade of “C” or higher required]

PSY 113 - Exploring Psychology

PSY 221 - Research Methods in Psychology I [Grade of “C” or higher required]
(Prerequisite: Psy 112 [C or higher], STAT 215 [C or higher])*

PSY 222 - Research Methods in Psychology II*
(Prerequisite: PSY 221 [C or higher])

PSY 236 - Life-Span Development

PSY 330 - Abnormal Psychology

PSY 490: History and Systems of Psychology
(Prerequisites: PSY 112, three other psychology courses and junior standing)

* Starting in Spring 2007, Psy 221 and 222 will be 4 credit classes. If you took Psy 221 or Psy 222 before Spring 2007, the 3 credits that you earned will meet the requirements of the Psychology Major.
With regard to the required courses, keep in mind:

1. You CANNOT take both Psy 235 and PSY 236 for credit. PSY 236 is the required course for Psychology majors. Psy 235 is no longer being taught, but if you transferred courses to CCSU, please check to see if you received credit for Psy 235. If you take both courses, you will not receive credit for PSY 235 toward the major or towards graduation! If you transferred Psy 235, you should fill out a course substitution form to have it count as Psy 236.

2. Since STAT 215 is a prerequisite for Psy 221, and Psy 221 is a prerequisite for Psy 222, it will take 3 semesters to complete the statistics and research methods sequence: STAT 215, PSY 221 and PSY 222. Eligibility for STAT 215 is determined by your SAT score or your score on the Math Placement Exam. If you do not score well on this exam, you may have to take Math 099 and/or Math 101 before you can take STAT 215. It is strongly recommended that psychology majors take the Math Placement Exam upon arrival at CCSU and that you start your Skill Area II requirements your first semester here. Try to complete the statistics and research methods sequence no later than your junior year.

3. PSY 490 - History and Systems of Psychology should be taken near the end of your college career. The course provides a review of the main ideas in the history of psychology and will integrate the material learned in many of the other psychology courses. Taking it the Fall or Spring of the senior year is ideal.

The Core Areas: These courses cover the main sub-fields of psychology. You must take one course from each of the FOUR areas below:

<table>
<thead>
<tr>
<th>Area</th>
<th>Social/Personality:</th>
<th>PSY 372 - Social Psychology OR PSY 470 - Theories of Personality</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>Biological:</td>
<td>PSY 342 - Sensation &amp; Perception OR PSY 450 - Physiological Psychology</td>
</tr>
<tr>
<td>C</td>
<td>Experimental:</td>
<td>PSY 200 - Learning and Memory OR PSY 281 - Cognitive Psychology OR PSY 440 – Motivation</td>
</tr>
<tr>
<td>D</td>
<td>Diversity</td>
<td>PSY 350 - Cross Cultural OR PSY 430 – Psychology of Diversity</td>
</tr>
</tbody>
</table>

The Electives: Three (3) additional psychology courses must be taken beyond the seven (7) required courses and the four (4) core courses. These elective courses can be selected from any of the undergraduate courses offered in psychology with the exception of Psy 239, Survey of Research Methods (This course does not count toward the Psychology Major). Courses not taken as part of the psychology core areas may be used as electives. For example, if you selected PSY 372, Social Psychology, as your core course for area “A”, you could use PSY 470, Theories of Personality, as an elective. A wide sampling of psychology core courses is particularly recommended for majors who plan to enter graduate programs in any area of psychology.
**Psychology Assessment Test:** As of the Fall 2002 semester, all psychology majors are required to take a Psychology Assessment Test in order to graduate. The test is administered according to the following guideline:

- All students with Senior standing (86+ credits) will be eligible to take the test
- The test will be administered at least two times per semester. The dates will be posted outside of the Main Department office the first month of class every semester
- Eligible students will register to take the test with the department secretary at least one week before the scheduled exam date

The Psychology Department encourages you to plan ahead and registered to take the test with enough time to avoid being denied graduation because of this requirement!

**A Word to the Wise:**

It is strongly recommended that students involve themselves in some form of special study, research or field work in their junior or senior year choosing as an elective one of the following courses:

- PSY 496 - Internship in Psychological Applications*
- PSY 498 - Topics in Psychology
- PSY 499 - Independent Reading and Research in Psychology*

*These are special courses in which you will work closely with a particular faculty member. Please talk with your advisor about how to enroll in them.
4. THE MINOR

All psychology majors must complete a minor in a discipline other than psychology. Depending upon your interests and future goals, select a minor that will complement your psychology major. Check the CCSU Undergraduate Catalog for the specific requirements of the minor you choose. The requirements will be listed under the heading of "Minor, BA" for each Department. Commonly selected minors include Statistics, Sociology, Biology, Communication, Criminal Justice, Marketing or Business.

If you have an interest in focusing upon one or two sub-fields of psychology, such as cognitive psychology or developmental psychology, take courses that cover your area of interest as part of your psychology electives.

Minor in Gerontology

Psychology majors are eligible to minor in gerontology. The gerontology minor is an interdisciplinary program designed to provide students with a solid background in different issues related to adult development and aging. Students interested in getting more information about the minor or working with the aging population should look at the Gerontology Minor website (www.psychology.ccsu.edu/gerontology) or contact Dr. Carrie Andreoletti at 860-832-1646; e-mail: andreolettic@ccsu.edu, Dr. Charles Mate-Kole, 860-832-3105, matekolec@ccsu.edu or Dr. Marianne Fallon, 860-862-3181, fallonmar@ccsu.edu in the Psychology Department (MW208). (Note: courses used for the gerontology minor may not be “double counted” toward the Psychology Major).

The Minor in Gerontology consists of the following:

18 credits: 342; PSY 364, 458; NRSE one three-hour practicum chosen from PHIL 440, PSY 496, PE 450 or 470, BIO 390; and 6 credits of electives chosen from NRSE 490, PE 215, PSY 380, SOC 340, SOC 440, BIO 401.
5. A SAMPLE COURSE PLAN FOR PSYCHOLOGY MAJORS

To graduate in the Liberal Arts (BA) Program, 122 credits are required. Psychology majors must complete a minimum of 40 credits in psychology and 18-21 credits in a selected minor.

**For graduation a student must maintain a minimum cumulative credit-point average (GPA) of 2.0** and receive grades of C- or better in all courses required in the psychology major or the minor. Students must receive grade of C or better in STAT 215, Psy 221 and Psy 112. Psychology courses with D or F grades must be repeated if the course is required or is in the 42 credit major.

¹Depending upon your score on the Math Placement Exam, you may need to take Math 099 and/or Math 101 as a prerequisite for STAT 215.

²To meet the graduation requirement of 122 hours, one semester you may need to take 17 hours.
6. Psychology Major Worksheet (for students entering in the Spring 2007 - Present)

Study Area I - **Arts & Humanities** (9 cr hrs)
[Literature, Philosophy, Fine Arts]
(No more than 6 cr. in one discipline)

Study Area III - **Behavioral Sciences** (6 cr hrs)

| PSY 112                      |
| PSY 236                      |

Study Area IV - **Natural Sciences** (6-7 cr hrs)
[Biology, Chemistry, Earth Science, Physics]
(Lab experience required)

| PSY 112                      |
| PSY 236                      |

**PSY Electives- Any 3 additional courses:**

| PSY 372 or PSY 470           |
| PSY 342 or PSY 450           |
| PSY 200 or PSY 281 or PSY 440 |
| PSY 350 or PSY 430           |

**MINOR (18- 21 credits)**

| PSY 112                      |
| PSY 113                      |
| PSY 221                      |

**ADDITIONAL ELECTIVES** (to complete 122 hours)

| PSY 221                      |
| PSY 222                      |

**International Requirement**

| PSY 112                      |
| PSY 113                      |
| First Year Experience Requirement |

**Taking the Psychology Assessment Test is a requirement for graduation**

* Pre-requisites for Psy 221 are:
  Ps 112 (C or Higher) & Stat 215 (C or Higher)

**Pre-requisite for Psy 222 is:**
  Psy 221 (C or Higher)

* Starting in Spring 2007, Psy 221 and 222 will be 4 credit classes. If you took Psy 221 or Psy 222 before Spring 2007, the 3 credits that you earned will meet the requirements of the Psychology Major.
If you wish to work as a professional psychologist, a graduate degree is an absolute necessity. Admission to graduate programs in psychology is very competitive. In order to be admitted, you must complete a rigorous undergraduate program, score well on the Graduate Record Examination and the GRE’s Advanced Test in Psychology, and demonstrate a capacity for independent research.

Students planning graduate study should concentrate on taking as many courses as possible from the four core areas (Developmental, Social/Personality, etc) listed in the requirements for the major. Generally a broad undergraduate background, rather than over-specialization, is best preparation for graduate training.

7.1. Recommended Activities/Courses for Career Planning.

The following is a sample list of recommended activities (*) and courses for career planning to graduate school:

7.1.1. First Year

- Attend The Psychology Department Colloquia Series during all your years at CCSU.
- Join the Psychology Club
- While completing most of your general education requirements during your first two years, work on the basic psychology requirements, including statistics and research courses.

Courses: FALL: PSY 112 - General Psychology I PSY 113 - Exploring Psychology

SPRING: STAT 215 - Stats for Behavioral Sciences

7.1.2. Second Year

- Become acquainted with several faculty members in the psychology department, who may be able to write letters of recommendation for you later.
- Write a preliminary resume.

Courses: FALL: PSY 236 - Life-Span Development PSY 221 - Research Methods I

SPRING: PSY 222 - Research Methods II PSY 200 - Learning and Memory

(*) Adapted from A.P.A. (1987), *Is Psychology the Major for You?*
7.1.3. Third Year

◆ Continue to complete basic requirements for graduation
◆ Select and plan for completion of your MINOR
◆ Begin research with faculty and continue it throughout year. Talk with your advisor about how to do this.
◆ Begin to consider resources for letters of recommendation (e.g. research supervisors and professors of small classes)
◆ Explore opportunities for joining professional organizations as a student member (e.g., Eastern and/or American Psychological Associations)
◆ Redraft preliminary resume
◆ Attend state (Connecticut Psychological Association: CPA) and/or regional (Eastern Psychological Association: EPA) Psychological Conventions/Meetings, the Psychology club sponsors a trip for members each year.
◆ Do fieldwork, if interested, in clinical or counseling psychology
◆ Begin work on a paper on your previous research (e.g., your PSY 222 Research Project) for possible publication or presentation
◆ Courses: FALL:  
  PSY 450 - Physiological Psychology  
  PSY 330 - Abnormal Psychology  
  PSY 499 - Ind. Reading & Research in Psy  

SPRING:  
  PSY 470 - Theories of Personality  
  PSY 372 - Social Psychology

Apply to Psi Chi

7.1.4. Summer Between Third and Fourth Years

◆ Buy study guides for the GRE and MAT and begin studying them
◆ Write a third draft of your resume
◆ From research work, write papers for publication and/or presentation in Psychology Conventions
◆ Begin to investigate prospective graduate programs (consult with faculty and use library resources)
◆ Through application materials, find out about all the requirements or tests needed by individual graduate school programs.
7.1.5. Fourth Year

◆ Complete all degree requirements, research and fieldwork by December. Continue the research and fieldwork, however, because they may be helpful later.

| September | (a) Buy the current issue of *Graduate Study in Psychology* (published by APA, call 1-800-374-2721), and write to prospective schools for application materials or see [www.apa.org](http://www.apa.org).  
(b) Register to take the October GRE.  
(c) Begin requesting letters of recommendation.  
(d) Have letter of intent written and polished resume completed. |
| November  | (e) Have a faculty member or advisor check it for grammar, spelling and content.  
(f) Send completed applications to schools well in advance of deadlines. |
| December  | (g) Request transcripts to be sent from all colleges/universities attended.  
(h) If you are not going on to graduate school immediately, continue research, fieldwork, and faculty affiliations as long as possible. |

- Courses: FALL: PSY 490 - History and Systems of Psych  
  PSY 496 - Internship in Psych Applications

7.2. **Recommended Course Selections Outside Psychology**

- Statistics (STAT) and Computer Science (CS) courses  
- Natural or Physical Science courses (e.g., BIO 111/112)  
- English Composition courses (e.g. ENG 110/202/401)  
- Foreign language and culture courses  
- Word processing and data analysis skills  
- Public Speaking courses and/or classroom presentations

7.3. **Other Recommended Experiences**

7.3.1. Research Experience

Almost all graduate psychology programs require that you take courses in research design and conduct research studies. To gain research experience, you can either help a faculty member with ongoing research and/or register for PSY 499 - Independent Reading and Research in Psychology. You can apply for CCSU’s student/faculty research grants for student-initiated research carried out with a professor. Plan to present your research at a conference with the help of a faculty member.
7.3.2. Getting to Know Professors

Your application to graduate school will be judged on your letters of recommendation, along with your grade point average, your research experience, your Graduate Record Exams, and your breadth of background. During your sophomore and junior years, get to know a few of the psychology faculty and plan an independent project (PSY 499) with a professor. Ask your professors to write letters of recommendation before graduation while you are well known to them. These letters can be held by the professor or placed in a file established by you at the CCSU’s Career Development Center, Willard Hall #100 (832-1630).

7.3.3. Professional Organizations

◆ *Psi Chi*, the national honor society in psychology. Identifies you as an exceptionally good student in psychology. See Dr. Carolyn Fallahi – MW208 for further details.

◆ American Psychological Association student affiliation. (See [www.apa.org/students](http://www.apa.org/students)) for further information.

◆ New England Psychological Association ([www.nepa-info.org](http://www.nepa-info.org)) and/or Eastern Psychological Association student affiliation ([www.easternpsychological.org](http://www.easternpsychological.org)).

7.3.4. Internships

If you are planning to apply to a clinical, counseling, or community psychology program, you should try to gain some applied training and experience. Credit for these activities may be obtained through the course PSY 496 - Internship in Psychological Applications. The Psychology Department offers a variety of volunteer experiences under the guidance of the Internship Coordinator or individual faculty. Talk with your advisor or the Department Chair on how to arrange this.

7.4. Standardized Tests for Graduate School Applicants

Almost all graduate schools require that applicants take the Graduate Record Exam (GRE) and/or the Miller Analogies Test (MAT). Your results from these standardized tests are often as important as your grades in determining whether or not you are accepted. For practice exercises, there are a number of books available at local bookstores which review the basic math and English areas covered in the GRE general test.

The GRE Advanced Test covers a wide variety of areas within psychology: personality, abnormal, clinical, social, industrial, developmental, experimental methodology, physiology, motivation, perception, and history. To prepare for the GRE Advanced Test you should review by using a solid text in general psychology -- such as Gleitman's *Psychology*.

CCSU's Career Development Center has materials describing the Miller Analogies Test (MAT), application procedures, testing center, and practice analogies. Check with the Career Development Center for details about scheduling these tests.

7.5. Information on Careers in Psychology

The American Psychological Association (APA) will provide any interested psychology major with a free copy of their booklet, *Careers in Psychology*. You can write to request your free copy and to get more information about other publications, such as, *Graduate Study in Psychology* and *Is Psychology the Major for you?* Write to American Psychological Association, 750 First Street, N.E., Washington, DC 20002-4242. You can also visit their web site at: [www.apa.org/students](http://www.apa.org/students).
APPENDIX A

Psychology Major Worksheet (for students entering in the Fall 2003 – Fall 2006)

Study Area I - Arts & Humanities (9 cr hrs)
[ Literature, Philosophy, Fine Arts ]
(No more than 6 cr. in one discipline)

Literature ________________
____________________________
____________________________

Study Area II - Social Sciences (9 cr hrs)
[ Economics, Geography, History, Political Science]
(No more than 6 cr in one discipline)

ELECTRONIC HELP FROM THE ADVISING CENTER

The Advising Center at CCSU (Willard Room 100) maintains an excellent website that can help you with your advising concerns. It is located at: http://www.ccsu.edu/advising.

The key pages of their website include:

1. Meet the Staff
2. FAQs (Frequently asked Questions) for New Students
3. Resources for Faculty Advisors
4. Links for Career Exploration
5. Thinking about Graduate School?
6. Internships
7. What Can I Do With a Major In . . .
